WEST COAST ITEMS.

-A telegram of the 6th from Guayaquil says
that the insurance companies are paying their
bases in full on account of the late disastrous fire,

—The new President of Chili, in his message to congress, guarantees complete liberty of elections, We would recommend this wise act to the thought ful consideration of Gov. Campos Sailes.

—A Santiago et Gov. Campos Sailes.

—A Santiago telegram of the Stit announces the resignation of the Zoñaitu cabinet, which has been accepted. This was caused by the deputies relusing to vote the budget while this cabinet remained in power.

—In the Chilian congress the government has a small majority in the senate and the opposition a small majority in the clamber. The prime minister on the 6th informed the latter hody that the government would not consider itself at the mercy of a hostile majority of these wises in that house as long as it enjoyed the confidence of the senate.

RIVER PLATE ITEMS.

—A report is current in Buenos Aires that Sarah Bernhardt will visit that city next season.

— On All Souls' day Admiral Saldanha da Gama's grave at Rivera was profusely decorated with flowers.

—The press of Montevideo is said to be opposed to the projected revolution and says that no matter low bad the government may be the people will not take up a ms to overthrow it.

—An officer may have a sublier beaten to death and suffer no great inconvenience, but lei a school-master thrash an unruly boy and the nation is aroused, law is outraced and the nedagogue is thrown into prison,—Breater Aires Herald. And it is quite as true in Brazil as in Argentina.

—An American exchange says:—"Buenos Aires has now a pupulation of nearly 991,000, and a death rate of 21 1-3 per 1,000 of the population."
How these figures were envolved no one can know. But that they are absolutely innerliable, few will care to dispute.

—According to official returns there were 1,456 marriages, 7,760 biths and 4,419 fleaths in Buenos Aires during the three monities ending Sept, 30. Among the causes of death were: typhus 31, diphtheria and croup 44, small-pox 21, measles 8, searlet fever 19, tuberculosis 305, bronchitis and pneumona 331.

—It will surprise our readers to know that hard a ond railway sleepers are actually being imported uno this country from Australia, but such is the case. Quetracho sleepers cost \$1.50 gold while those from Australia can be imported for \$1.25 gold each and soon a cargo will be landed.—Buens Aires Herald,

—The Times of Buenos Aires says that "it is found that monkeys are very fond of locusts and eat great numbers of them with great relish." Our colleague then asks how it would be were the government to import a few thousands of monkeys to check the locust plagne. Splendid ! And the is just the opportunity locustry! It's a good scheme, but it won't do to put it in print. The Times may look for a private communication on the subject.

the subject.

—It is to be expected of a congress that deems it wise the persecute foreign insurance companies that it would for the hench of a smill and powerful singar trist tax all the people who use sigar. Such a congress is a public danger, a menace to liberty and the constitution, and a discreditable horde of cheap masqueraders, with whom are a lew able, decent and honest men who are quite abanned of their company. So me day, the people will remember these their enemies and will manage to get even with them.—B. A. Herald.

—The sarga honnix model now to be sent to

to get even with them.—B. A. Herald.

—The sagar homely project now to be sent to concress is the most impostons outrage on the public of all the outrace. Which have been perpetrated in the name of the law. It is an outrage on the constitutional provision for the unformity and equality of taxation and on the common people, who should arise in their might and so speak that even a venal congress could hear and tear, it is shameful that any ring should have the supreme immunitence to ask for such an outrageons impost.—Buenos Aires Herald.

—The wangs men of the combbe who have

cons impost.—Bunns Aires Herald.

—The young men of the republic who have brains and pluck should inaugurate a movement to reform the constitution and do away with the provincial governments, which are no-eless, mischevons, costly and hotheds of corruption. We have 4,500,000 prople, and to givern them we have 15 executive establishments, each one heing as elaburate as that of the Bivish empire, 15 senates and clambers of deputies, 15 judical departments, and all the machinery for 15 governments, any of which should be able to govern a population nut so large by a million as that of London. It is all very ridiculous.—Buenos Aires Herald.

very ridiculous.—Buenos Aires Herald.

—The large sums of money wited by the national government for the destruction of the linearls might be used to better advantage or at least in a more just manner. The commission appointed to see that proper work is done in the externainating line visited a poor man in San Fernando the other day who had six sparres planted to maize already sprouted, and compelled him to plungh up the entire field in order to destroy the eggs of the locusts, under a penalty of paying a fine of 8500. The commission refused to paying a fine of 8500. The commission refused to pay the poor farmer a cent for his labor or for the loss of his maize crop.—Buenos Aires Herald.

THE New York papers state that Mr. Charles R. Flint is building a new steam yacht which is to run 33 knots, or 38 uiles, an hour, which will nake it the lastest vessel affant. The design is such, likewise, that it can he transformed into a lorpedobat in three days. This will be interesting to Brazil.

This old and well known hotel os situated in une of the healthiest and most picturesque parts of the "Heresopolis valley (Organ Moontains), a short distance from the "Alto dis Seria" and in full view of those strangely-shaped peaks which give this range of monetains its piculiar name. The hotel has been thoroughly removed and improved, and affords all the conform and conveniences which the visitur can desire. It has an abundance of pure cold water for thinking purposes, shower boths and suntation. Terms moderate. For invalids and convoluceauts Theresopolis is impuestionably the best resort in the neighborhood of kin the Janeiro. It is higher and deyer than either Petropolis or Nown Fiburgo, and has long been considered favorable for those suffering from weak lungs.

It is expected that the railway from Pienlade to Bananal (at the foot of the monatains) will be in operation before the end of October.

THE CRISIS.

They say that at our thealies matters are in a very had state. The crisis, through which, thanks to the incapacity of those who govern ins, we are mow prosone, has extended to the play-houses. It is even asserted that one company reduced the play of its acture x 25°2.

So far as we are able to gather from reliable sources, the criss in Brazil has not been overestimated in spite of the force decids which the native papers and the government of that country have flung about. In fact that famous telegram to the London Times seems to have just almus hit the mark in so far as the truth of the matter was concerned.

Reuter's Agency has received the following statement from Senhor J. That a crisis in the finances of Brasil was ineritable has been pointed out by The Financial News ever since the republican party in that country entered upon the policy which now seems to have ended in disaster. A I'll grading a six months moratoriam has been presented to concress, and a revenue ball for the impease of a tax ition which is already intolerable. Niturally, the Brighton officials assure us that the financial trouble at Rio has been "greatly exaggented"; but their assurances must be received with great caution. Brazilian officials are shifty customers. My information is that the trouble is quite as bad as it has been represented, on I that there is worse ahead. The currency question alone constitutes a formidable difficulty, and that is not by any means the only run with a both the government has to contend. The general finances of the country have for some time just been growing more and more involved; and thanks to The Figurancial News, English invessors have had abundant warning of the crash which seems to be now near at hand.

RIO DE JANEIRO, NOVEMBER 10th, 1806.

Considered dispassionately, the recent suppression of the monarchist organization in Sao Paulo was one of the worst measures that could possibly have been adopted. So arbitrary an act will of course create sympathy and will result in an increased number of adherents, but aside from this it could not fail to be beneficial to the re-public and to the people to have such an public and to the people to lave such an organized party in open and active opposition. The Sao Paulo monarchists were carrying on their propaganda in an open and legal manner, and as long as they are permitted to do this there is very little danger of a conspiracy. Could they have elected a few deputies in the coming election, which is far from probable as they are not yet organized and united, the results would have been most beneficial. In his wisdom, however, the governor has thought it best to turn his back on his own professions and to suppress the opposition by armed force. Here in Rio one monarchist candidate for congress is already in the field, and in spite of threats he proposes to contest the election. He is a man of wealth and experience and would be an invaluable addition in legislative work were he elected. We of course can have no neground and previous interests. would be an invaluable addition in legislative work were he elected. We of course can have no personal and partizan interest in such au election, but we have a decided interest in good legislation and good government and we know that these are of very improbable realization as long as there is no opposition in congress. Without the wholesome check afforded by a vigilant opposition, good government in a republic is well nigh impossible. Corruption its sure to creep in, and arbitrary measures will very speedily overthrow the liberties of the people. people.

The election news from the United States is not wholly a surprise to us, for we have never believed that the American people would make the ruinous mistake of people would make the ruinous mistake of substituting a depreciated silver currency for the existing system, defective as it may be. As a rule the common-sense and good judgment of the American people can be implicitly trusted. In so large a population, composed of so many heterogeneous elements, we may expect to meet a great many erroneous ideas, and at times such ideas may gain a momentary ascendency among the people, but in the long run and when the public mind is forced to consider the question seriously, we can feel safely asamong the people, but in the long run and when the public mind is forced to consider the question seriously, we can feel safely assured that the people will not support any measure which promises to bring discredit upon them. There is no doubt but what a majority of the American people are honestly in favor of bimetalism, and would cordially welcome any measure which might secure that desideratum, and it may be that a very large percentage of them at first believed that Bryan and his followers were honest advocates of such a policy. A closer study of the question, however, soon demonstrated the fact that the democratic-populist party was really advocating silver monometalism, rather than bimetalism, and as this threatened a reduction of the dollar to a bullion value of 53 cents, or less, and foreshadowed a profound disturbance of values throughout the whole country, an injury to commerce and industry, besides being an incalculable

discredit to the country, the people promptly rejected the whole scheme and with such an overwhelming majority that there can be no mistake about it. They have buried Bryan and his sophistries so deep that we shall probably never hear from them again. And it is significant that the victory is not one of party, but of principle. Both parties were divided on the question, but it so happened that the gold standard men were a majority in the republican party and they accordingly chose their candidates and platform in the interests of that principle. Many prominent republicans at once with. shall probably never hear from them again. Many prominent republicans at once withdrew from the party and thousands from its rank and file voted for the free silver can didates. On the other side, the free silver advocates succeeded in capturing the democratic convention and in choosing candidates and platform representing the most extreme views of free silver coiuage and populism. This split the party and drove a very large percentage of it into the republican ranks. Mr. McKinley therefore owes his election to the united efforts of the sound money men of both parties, and his enormous majority is composed of demcommons majority is composed of democratic as well as republican votes. Practically he was elected by the better elements of the whole people, and not by one particular party. He can not ignore the circumstance that he does not represent a party, and that it will be a serious mitake were he to seek the promotion of particular. he to seek the promotion of partizan rests. He was not chosen to promote interests. his favorite theories of high protection, for there were multitudes of free traders among those who voted for him. Under such cir-cumstances it would be a mistake for him to urge further protective measures upon congress. He is elected to maintain the public credit and to guarantee stability in money values, and that is the great work set apart for him to. do.

A CURIOUS DEFENCE.

On Sunday last the editor — or director, as he prefers to be called—of the Jornal de Commercio published his reply to the paral-lel to which we called attention in our last issue. He admits that he criticised the corruption of some employes of high rank," but denies that he was hostile Gen. Grant. He also denies that he sought to have us expelled from Brazil, and says that it was not our opinions but the "false telegram" to the Times that he had attacked, and that only once before, in the case of the Trindade discussion, had he undertaken to call us to order. In this, as in the present case, he assumes that the editor of

present case, he assumes that the editor of this paper was guilty of deliberate falsehood, and he shows no compunction in saying so. As for the truth or falsity of Dr. Rodrigues work as editor of O Novo Mundo and as correspondent of the Jornal do Commercio, we have nothing to do with it in this discussion. We sought to establish the fact that he exercised the fullest liberty of criticism while a resident of New York and as cism while a resident of New York, and as cism while a resident of New York, and as he admits this there is no need of further argument. If he exercised that privilege, even to the extent of discussing the "cor-ruption of some employés of high rank," how is it that he seeks to throw odium on an American exercising the same privilege by virtue of the highest law of the country, while residing in this city? It is idle to say that it was the *Times* correspondent whom he censured, for he repeatedly asserted that the editor of this paper is said cor-respondent, and he repeatedly quoted from the columns of this paper to prove that its editor was engaged in a campaign of systematic defamation. From October 17th the *Jornal* devoted about one column a day to this task, and when its director now says that he never "occupied himself with such opinions" (those of *The Rio News*), he asserts what he knows to be false and what his own paper proves to be false and what his own paper proves to be false. The attack was personal in character, full of charges of "falsehood," "defamation," and insulting insinuations. And it was an attack so unscrupnlous in character, so malignant and venemous, and so devoid of all courtesy and honesty that even many of his best friends were repelled by it by it

As for the denial that he sought to have us expelled from the country, what did Dr Rodrigues mean when he wrote (Oct. 151h):
"What is seen in everything the Rio News
writes is profound hatred for this country
which has tolerated so much and for so long which has tolerated so mice and for so long a time"? To be sure he repented the following day—or pretended to do so—and hypocritically protested against expulsion, after having driven two deputies to demand that penalty and the government to seriously consider it; but he couched his protest in terms so insulting and so devoid of even the commonest courtesy, that no one took it seriously.

His main defence however is based on th falsity of the Times telegram. But was it false, It stated that the situation was criticalwhich was true; that it was reported that 300 applications in bankruptcy had been made — which was true; that many im-portant firms were embarrassed—which was true; that the banks were restricting operations—which was true; that a moratorium bill had been presented in congress—which was true; that an increase in taxes in the revenue budget was proposed-which was true; and that the government was helpless and congress incompetent—which was also true! Now where is the "falsity"? The only falsehoods in the whole matter are to e to He be charged to Dr. Rodrigues himself. He accused ns of saying that there had been a "general increase" (augmento geral) in taxation — which was maliciously false taxation — which was maliciously false: he says that we have systematically defamed this country — which is contemptibly false; and he himself telegraphed to the *The Times* that the only increase proposed in customs duties was on beer—which was deliberately and absurdly false. In fact, this tempest in a teapot was nothing but an ill-tempered personal attack on the editor of this paper because of unfavorable news from London in regard to business transactions to which in regard to business transactions to which Messrs. Dumont and Rodrigues were not strangers. This was virtua the Joi nal of October 17th. This was virtually confessed in

As for the "300 applications in bank-ruptcy," that subject has been pretty well thrashed out already. The statement was first made October 3rd, and was afterwards repeated. Its authors were two prominent and respectable lawyers. And it was repeated everywhere in the street by respectable business men. And yet not one word of denial ever appeared in the Jornal, or any other paper, until October 14th, eleven days after it appeared in London to Wonderful is the patriotism, surely, which can overlook so serious an assertion until a personal grievance arises! It reflects as much credit on the Jornal do Commercio as did Dr. Rodrigues' previous attack on us when he had to invent opinions and as sertions for us in order to find an excus or his thunderbolts. We proved his assertions false at the time, and he dropped the subject, but now he resurrects them an seeks to make capital out of them again He is welcome to all the credit he can ge out of such journalistic forays, for neither one of them has added to his reputation as a journalist, nor improved his reputation as

man.
Before concluding he tells us, somewhat defiantly it would appear, that we can not close his mouth by trying to shift our responsibility upon his shoulders. Let him poisibility upon his shoulders. Let film rest in peace; we shall never make such a mistake. We can better carry our own res-ponsibilities, than José Carlos Rodrigues can carry his. From a man in his position we might expect courtesy and considera tion, but we are no longer deluding our-selves in that respect. Of one thing, how-ever, he can be fully assured: we are not looking to him for instruction either in journalism or in morals, and some day, should he continue his policy of abusive and slanderous criticism, we shall feel com-pelled to tell him why. We do not claim to be infallible in our work, nor have we any objection to public criticism, but we do object to the corsair method of ascribing to us bad motives and perverted statements

—The Commercio de S. Panlo is now carrying out the "silent protesi" so dear to the Brazilian heart. When the police raided the monarchist meeting and closed a students' monarchist paper, the Commercio announced that it would no longer discuss Brazilian polities. And now it has nothing to say on that subject. It reminds us of the Jirvail do Commercio during the naval revolt. How the republic is to exist under such a regime we do not know.

There was a fight in S. Paulo on the evening of the 6th inst. between regulars and police soldiers, one of the former being gravely wounded.

—According to private sources of information from São Paulo some of the Freuch Canadians who were supposed to be settled on plantations, are diffing back to that city, and it is feared that the whole crowd will soon be asking for assistance to return to Canada. This does not agree with the rose-colored statement just issued by the authorities

It is annou need that the São Paulo medical congress next year will be opened October 12th. It is expected to have plans presented for sanitary improvements in São Paulo, and for the extinction of yellow fever in South America. It is to be feared that the date selected is much too late in the season, as fireigners will not care to come at a lime when the heat is becoming unpleasant. October 12th may do very well for sentimental reasons, but July 12th would have been much more practical.

July 12th would have been much more practical.

—According to the published statements of Dr.
João Mendes de Almebla, there seems to be no instice for monarchists in São Paulo. His appeals to the courts are simply disregarded. In the case of the monarchist club recently closed by the police, the furniture and other effects in the place were confiscated and sent to the juis dos ausentes. A republic ought to represent equal justice for all citizens, irrespective of their opinions, but this is apparently very far from being the case in the state of São Paulo.

RIO GRANDE DO SUL.

RIO GRANDE DO SUL.

The general commercial and financial crisis seems to be intensely felt in the state of Rio Grande do Sul. The piece of heans has risen to 408000 per bag and those of other articles of prime necessity are stated to have risen in proportion. Trade is reported to be almost completely paralysed. At Bage there continue to be bitter complaints against the custom-house authorities for refinsing to permit the shipment of merchandles to towns in the Intenior. The minister of finance is said to have declared in answer to the complainants that they must apply to congress. The newspaper Rio Grande do Sulhas published an article vigorously protesting, in the name of the republic, against the suppression of monarchist clubs in S. Paulo and against the employment of trops to prevent ladies from carrying weaths to the Paquetá cemetery.

There have circulated in Rio Grande reports of the arrests of Silveira Martins, Visconde de Ouro Preto and other prominent men, but they lawe since been contradicted.

At Santa Anna do Livramento some daya ago there was a facit between 13 Urigranyans and soldiers of the 18th battalon of infantry. Two of the former were wounded.

The property-holders of those sections are contributing toward the cost of the improvement. It is a jity one long streich of street can not be laid at one.

The Noticia of last Thursday says that Gen. Dyonisio Cerqueira, wille occapying ad interim the office of minister of war, gave proof of his devotion to the republic by acts which, when they become known, will be itely appreciated. Is one of these the courageous act of preventing ladies from entering the cemetery at Paquelá with wreaths to place on the graves of the dead?

-We regart to hear that the American minister has been all for some days past, but we are glad to say that it was nothing serious.

-Is there any law authorizing the commander of a detachment of sublices to examine wreaths carried to a cometery and to refuse admittance to such as fail to obtain his approval?

-Another prorogation of congress—this time to December 10th—is now spoken of. No better proof is needed of the absolute unfitness of this congress for the work it has in hand,

It is a entions feet that the Estrella Polar of Pedreim, São Poulo, of the 25th ult., repeated that long expluded stery about the disappearance of the Juan Fernandez island in March last. We take pleasure in advising our colleague that the island is still to be seen, and is of full life size.

—We take much pleasure in noting that the Equivable has recently appointed Mr. T. T. Watson, formerly manager of that company's business on this coast, as general manager of its husiness in the western states. He will be located at Chicago, where he entered the company's service twenty-six years ago.

There is something very curious about our cable news service. Not long since we were intermed by cable of the election of Alderman Faudell Phillips as lord mayor of London, and yet newspapers received about the same time state that the said election nectured Sept. 29. Is it possible that our cable news are manufactured from the newspapers received on this side?

—The prefect has residved in strictly enforce the minifelpal outlinances against the deposit of rub-hish, garlage, ilead animals, etc., in the public streets. This is well, but at the same time he should provide a better service for the removal al such things from provide houses. It would be extremely monymerised for a house-holder to keep a dead cut in the house for thee or lour days.

-The jacobins very appropriately celebrated the — the jacobins very appropriately celebrated the arrusal of Col. Murcina Cesar and his battalion on Tuesday by making historibances. They assailted Col. Accidi in a bather's shop on Rua da Assembléa, Lient. Vinhees in a confectionery on Largo de S. Francisco de Faula and several other persons. The Gazeta da Tierde was threatened with an attack, but the threat was, furtunately, not executed.

—It is pleasing to note that the London cor-respondence of the Yornal to Commercia, which was published on the 4th inst, discreely omits the extraordinary telegran of the 15th alt, from the extraord of that puper to the Times, and gives a long excerpt from the South American Journal which the Jornal occasionally denomes as "subsidized." Necessity sometimes makes strange bedfellows, surely!

-On Thursday night soldiers of the 7th bat talion "moreira-crsattzeil" the café at No. 1 C Rua da Guarda Velha. The proprietor succeeded in effecting his escape, but his furniture and conckery were reduced to a pitable state. The soldiers' excess for this demonstration was that the proprietor wished to collect pay for the beverages which they had consumed. Of course that was an unpardonable insolt to the republic!

-For the past fortnight reports have been daily corrent of the intention of the President to resign, and also of conspiracies for his deposition. It is ann are to constitute for its deposition. It is now openly said that the military element will not permit Manoel Victorina to succeed to the presidency, as he is legally entitled in do under the constitution. He is not a fourthe with the jacobins and the military agitators, and the late activity of these two disturbing elements gives some foundation for the reports.

-In the Senate on Saturday Gen, Pires Fer reira made a violent attack on the governor of Plauly, when he called a petty tyrant and accused of having caused vaters to be shot because they attempted to exercise the right of suffrage. Crim inal governments, he said, should be treated like criminals. This is certainly true, bot, if the general had said it in the time of Floriano, he would have gone to prison and probably been shot. And yet the general was a florianista and voted for the resolution endorsing all the crimes of Ploriano and his subordinates.

-The editor of the Jornal do Commercio, in his unsuccessful effort to defend his conduct toward: another journalist, claims the right to say what he deems advisable without regard to consequences. He should not, then, deny this right to the Time. correspondent, who, in the performance of his correspondent, who, in the performance of his duty of funishing news to the paper which he represents, appears to have been so fortunate as to protect the public from the schemes of those who are endeavoring. For purposes which in time will doubtless be disclosed, to conceal the nature and extent of the present commercial and financial crisis in Brazil.

-The chief of police, when informed of the threatened attack on the office of the Gazeta da Turde, is said to have advised the proprietor to defend the establishment and the lives of his employés in any way he deemed most efficacious. This advice is significant and conservative men would do well to meet and adopt an organized plan of self-alefense and mutual protection during the troubleus times that are apparently coming. The object of such a step would not be to sheld any one from the legitimate consequences of his acts, but merely to see that he is treated in conformity with law and justice.

THE PRESIDENT:

For some days past the condition of the President has been far from satisfactory. On the 1st institute altendant physicians reported malarial complications, but stated that the wound caused by the operation was healing satisfactorily. Since then the reports have slown considerable resilessness at times, and finally an opening of the wound. His temperature continues low, however, and he rests comparatively well. Last night's report (1 a. in.) was not so favorralle, staing he had not slept as well as the preceding night and that the debility continues.

Brasilian Exchange: the Sinhy of an Inconvertible Currency: by J. P. Wileman, C. E. Buenos Aires, 1896. This small volume of 260 old pages discusses a question of the very highest importance to this country, and in a numer which renders it deserving careful and thoughful consideration. From the lucid exposition of the subject which Mr. Wileman gave to the readers of The News some months ago, it must be admitted that he understands the question thoroughly, and that his opinions are worthy of consideration. The houk is alivided into two principal sections: "International Exchange," and "Nominal Exchange," and "Nominal Exchange," and "Nominal Exchange," and "Insect worth and the influence," These two phases of the question are hopelessly confused here, and it is full time that their differences should be explained, Mr. Wileman's book is written in English, lut we shall hope to soon hear of a Portuguese edition.

"THE QUEEN OF TABLE WATERS"

"At the head of all the waters examined for purity and freedom from disease germs."

WONDERFUL INVENTION.

Who does not care about tealth and economy? There is no doubt that we all do, and is order to enjoy a confortable bath, we must have many of these instantaneous machines which, in 5 misuses, will bean a sufficient volume of water and for all domestic purposes, always ready day or night and consuming are insignificant quantity of gas.

These machines are made entitley from copper and their durability is therefore not affected by any chemical action arising from the acids contained in the water, and we claim the three following points of vantage:

1. They consume 80 ofo izer gas on account of the air pressure;

2. They will last a lifetime and not corrode;

3. Besides being an object of utnost necessity, endorsed by leading medical authorities, they are a handsome feature of decoration to any part of a house and are guaranteed for 10 years.

In stock: Gasoline machines, especially adapted for the use of planters, important coffee machines, suitable for Hotels and Kestaurants.

SEA SICKNESS.

Marvellous cures obtained by the use of

NECTANDRA AMARA

the famous Paulista remedy,

APPROVED and sale AUTHORIRED by the Inspector General of Hyglene with registered Trade-Mark at the Junta Commercial; Awards obtained at three Exhibitions at which it competed, viz: Preliminary Exposition of Rio de Janeiro in 1888, Paris Universal Exposition in 1889 and the Columbian Word's Fair at Chicago in 1893. The following six letters are more than sufficient to prove the great efficacy of this extraordinary medicine in cases of that terrible complaint.

I have not yet informed you that during my voyage from Brazil to this place the Nectandra Amura accomplished wonders; it is really astonishing. On brazil, three of my companions (two Portuguese and an Argentine) who suffered so much from seasikness that they renamined lying down all day and were maile to retain the find that they are, were completely circuit by taking only two spoonfuls of Nectandra Amara. The first two were so much pleased with the result and were so anxious to obtain a hottle of the remedy that I was obliged to offer them one of those which I had taken the precaution of keeping for my own use. They landed at Pernambneo, assuring me that they will never line an opportunity to recommend this preservative to their friends who suffer from sea-sickness. Accept my congratulations of the success of your remedy.—Havve, April 181, 1891.—L. B. de Miranda.

On board I gave some of the Nectandra Amara wine, which I had brought with me fut my own use, and it helped us all a great deal against the sea-sickness. Dr. Homen Ottori who was one of the pussengers in the steamer, gave some of the pussengers Tincture of Nectandra Amara; and asking him for a Testimunal, he did it with given the samere, saying that in Guarattingnetá, where he exercised his profession as a physician, he had applied it continuously in case of gastic-intestinal complaints with very good results.

Some of the other passengers also primitised me testimunials which I shall forward to you as soon as I receive them. Aynorés, 15th November 1892. Augusta Dr. Almenta Magalitäes.

3. Sautos, 25th December 1894.

I beg to thank you again for the two bottles of Tineture of Nectundra Amara, which you were kind enough to offer me and I take great pleasure to inform you of the splendid results obtained on board the sis Aquitaine on my last voyage south. At the dinner table I noticed the absence of some friends and learned on inquiry that they had retired to their calms, being down with sea-sickness.

I booked them up and after taking some Nectundra Amara, I had the great satisfaction to see them later on in the evening on deek, completely re-established.

Still more: my cainin-partner, an Uraguayan, who was on his return to his country, told me that he suffected on heard from sea-sickness to such an extent that he had never been able to leave the cabin or to walk, such was his disposition to wantit whenever he attempted to get un from lus hed. Very well, with even that passenger I obtained a complete vicinary by giving his some Nectuadra in the afternoon and at night; the next morning I had the great jety to find him on deek, where, on seeing me, be thanked me many times, asking me at the same time for the name of the medicine, as he intended in his proportion of the medicine, as he intended in his proportion of the medicine, as he intended the lany some of it on our arrival at Santos.

Myself, I fortunately do not suffer from that complaint, and had therefore no necessity to make use of your powerful preparation; as you see, however, it had all deshed effect whenever it was wanted. Yours etc. Eanant PINTO.

4.

Pernambuco, on heard sts Alagons, 17th Juanuary 1895.

It was really at an opportune moment when you had the kindoes to ofter me your must excellent preparation, the Tinchure of Nectandia Amara, hearts when no hoard, I was very ill and heenne sea-sick, due in all probability to the long time that I had not undertaken a sea voyage.

I took some of your medicaine with a very good good result and heg to thank you therefore most sincerely for your kind offer. Herewith please find three testimonials of some fellow-passengers, who were also honefited, like myself, by the use of that methains.

I shall feet gratified if you will use this letter at your own discretion and have the honor to be, Yours sincerely, ANTONIO PINTO DE MORAES.

5.

Lishon, Felt, 15th, 1805

Lishon, Felt. 15th, 1895
Mr. Joaquim Bueno de Miranda — It is a duty demanded by justice that I should inform you that the Tincture of Nectandia Amara, which I gave to companious by sea-suckness was successful far heyand my expectation. I don't know whether I ought to confess that I myself, being always indisposed when in Iravel, have for the first time miranhouly succeeded in making a pleasant journey, which I can only altribute to the use of your remedy. I well remember the reluctance with which I accepted your samples for any one who loses 20 years in the ding husaness has almost the right in doubt the efficacy of any remedy that is announced. Wishing you much success in our business, I am, yours truly,—Jose? Casaa the Marros.

Santo Thirsu (Portugal), March 16th, 1895.

Mr. Juaquim Bento de Minaula. — My dear Sir: — I arrived here, after a pleusant wayage, on the 13th on February. My wife, who suffered very much, oltanued relief from sensiteiness by taking the pils and Iniciue of Neemaha Aman, which were very heneficial to all the passengers among whom I distributed those with which you thoughtfully presented me. Hoping that you are enjoying doubleteld, I, any, yours tutly, Joye J. Perrina Braiches, N. B. — The printed writing propagers on the house containing this remetly show that it is wonderfully efficacious in caining promptly and radically dismiters of the stomach and intestines, to which one is liable when travelling by land or sea. Consequently any traveller who its acquainted with it will never fail in take it with him, as a preventive of soich diseases on his journeys, as he will find it very beneficial.
